

Zurich, 24.01.2023 – New Annual Statistics added in the Informatics Higher Education Data Portal

Informatics Europe (IE) is pleased to announce that its [Informatics Higher Education Data Portal](#) has recently been updated with the data of **2020/21 academic year**. The Portal now covers statistics of **11 academic years for 23 countries** on students enrolled and degrees awarded at Bachelor's, Master's and PhD level, including gender distribution. Other data is also available in the Portal for selected countries, such as a comparative analysis of some **key academic positions** and corresponding **employment details**, including estimations of **academic salaries**.

Created in 2019, the Portal aims at providing the informatics community of academics, policymakers, industry and other stakeholders, a complete and reliable picture of the state of Informatics (Computer Science, Computing, IT, ICT) higher education in Europe. With plenty of opportunities for data visualization and in-depth analyses, the first five-year dataset is publicly available. After a quick registration on IE website with their institutional email address, [IE members](#) can benefit from the **exclusive access to the full dataset** (including the possibility to **download it**) as well as **the much-needed data about academic salaries**.

With this Data Portal, one of IE's most used and valued services, we empower the informatics community to better understand trends and improve issues in the European higher education system. If you wish to drive or contribute to the creation of analytical outputs and reports, and propose improvements to the IE data portal functionalities, please join our permanent [Data Analysis and Reporting working group](#). We welcome any contribution, regardless of your country statistics being featured on the Portal or not.

The update of the Portal greatly relies on IE members' data-gathering support. We are extremely thankful to all the [colleagues](#) who have contributed to find and interpret data at a national level. If you wish to support our community efforts in finding and interpreting your national statistics and making the status of informatics education in your country better known at a European level, please contact: svetlana.tikhonenko@informatics-europe.org.

Access the data portal at <https://www.informatics-europe.org/data/higher-education>

More IE Member Benefits

As our member, your institution can enjoy other services in addition to our Higher Education Data Portal. Here are some highlights:

- [IE's Department Evaluation Service](#): conducted by an Evaluation Committee of internationally recognized informatics researchers, carefully selected from our extensive network by IE's Executive Committee. Based on a standard procedure, the evaluation can be tailored to meet particular institute's needs.
- [Academic Leadership Development Courses](#): open to academic leaders at all levels of experience in Informatics and related disciplines, with the online course recommended for new & emerging leaders and the residential course for senior/established leaders. New cohorts in March and June are now open for registration – register now and share with your colleagues to enjoy early bird offers!

Visit [our webpage](#) to see how your institution can benefit from our membership and contribute to the informatics community in Europe!
